Nitish K. Chauhan,

I am a passionate web developer with a strong focus on ensuring and UI-friendly approach to the web. With technologies like MongoDB, Express.js, React, and Node.js, I am dedicated to creating innovative and efficient web applications. I possess a natural talent for problem-solving and thrive in collaborative environments. I am excited to contribute my skills to cutting-edge projects and work alongside like-minded professionals or organisations focused on growth.

Experience

Utho Cloud –(Cloud Engineer) – 2022 – 2023

My role at Utho Cloud was of a Cloud Engineer. Dedicated to testing new cloud features before implementation. As well as troubleshooting and installing various modules on Linux VMs. Further, coordinate the development of bugs that need to be fixed on the backend and frontend of the www.utho.com

Lenskart – (Executive) – 2021 – 2022

As a Lenskart Executive I was assigned to work with the PRG (Public Relations Group). And dedicate our expertise to solving challenges exclusively faced at our offline Stores channel. This is where I was introduced to react while interacting with the development team.

PROJECTS

Mr. Oadn –Django

Mr. Oadn is developed with a lifestyle blog in mind. The backend was developed using Expressjs, MongoDb Atlas for data storage, and Reactjs as the frontend.

Silk store – React

An open-source project that I'm contributing to and working with Reactjs to create interactive UI for the end user.

BMI calculator

I made this app when I joined the Gym, it's based on the Metric Unit System. The UI accepts weight and height as input from the user and calculates to display the Body Mass Index of the User.
